PROFILE SUMMARY

Results-driven Team Lead and Frontend (React) Engineer with 4+ years of commercial experience, currently leading a team of 4 developers. Proficient in technologies like React, Redux, JavaScript, TypeScript, HTML, CSS and SCSS. Some experience in backend development (Node.js, NestJS, Express.js, MongoDB, PostgreSQL), which enhances overall problem solving skills in frontend tasks. Quick to learn new tools and technologies, with proven skills in mentoring, code review, and successful implementation of scalable solutions. Experienced in working with diverse engineering teams to deliver high quality, high performance web applications. Passionate about creating accessible, user-friendly interfaces while optimizing application performance.

TECHNICAL SKILLS

- **Languages**
JavaScript, TypeScript

- **Frontend Frameworks & Libraries**
React, Redux, Redux Toolkit

- **API Integration**
REST APIs, GraphQL, Apollo Client

- **Version Control**
Git, GitHub, Bitbucket

- **Testing**
Jest, Enzyme, React Testing Library

- **Styling**
CSS, SCSS, Styled-Components, Module styles

- **Build & Tooling**
Webpack, Vite, npm, Yarn

- **Additional Tools**
Storybook, Auth0, Outlook Add-in

HIGHLIGHTS

- **Led a Sub-Team in Successful Project Delivery:** Managed a sub-team of 4 engineers within a larger team to deliver several large projects, achieving 100% on-time delivery and meeting all client requirements.
- **Passed Accessibility Audit:** Built a fully accessible, 508-compliant interface using WCAG techniques, resulting in a successful accessibility audit.
- **Mentoring and Code Review:** Provided mentorship and code review on various projects, improving team productivity and code quality.

WORK EXPERIENCE

iTechArt: SocialNative (React Developer & Team Lead), Duration: 2+ years

Description: Social Native is a marketplace technology company that connects brands with content creators to provide high-performing creative options for brand advertising with greater speed and lower costs. Marketers can enhance their social strategy using influencer marketing, custom content, and content editing.

Responsibilities & Achievements:
- Led a sub-team of 4 engineers within a larger team of nearly 20 to maintain the legacy application, resolve customer issues, and develop new functionality for the modern application.
- Successfully led several large projects, ensuring 100% on-time delivery and meeting client requirements.
- Developed a new application that allows users to connect their social accounts to the system.
- Integrated an AI tool to help clients create campaigns with customized descriptions and content requirements.
- Worked with technologies such as React, TypeScript, JavaScript, and Vite to ensure product success.

iTechArt: AgilQuest (React Developer), Duration: 2+ years

Description: AgilQuest is a product for reserving assets within an organization (rooms, equipment, parking, etc.). It provides the capability to search, reserve, and manage assets, as well as to manage users and their rights.

Responsibilities & Achievements:

- Built an accessible, 508-compliant interface from scratch, resulting in a successful accessibility audit.
- Resolved security issues identified in a pentest audit, enabling the application to successfully pass the audit.
- Implemented key features such as delegation reservations, visitor management functionality, and interactive views for understanding asset capacity, availability, and reservation management.
- Worked on an Outlook add-in application to extend the functionality of the platform for users.
- Worked with technologies such as JavaScript, React, Redux, SCSS, and Webpack.

iTechArt: HSFI (Full Stack Developer), Duration: ~6 months

Description: HSFI is a digital management system for street food quality control. The system helps improve the quality of street food by enabling managers and regional controllers to check the quality of street restaurants based on inspection results, reviews, and various reports.

Responsibilities & Achievements:

- Implemented core functionality such as user authorization, user verification, vendor creation, vendor search with filters, vendor profiles, routing, and internationalization.
- Performed performance optimizations that resulted in a 5x increase in report generation speed.
- Created unit test cases to achieve 85% test coverage.
- Contributed to the front-end architecture using the latest React development trends.
- Applied the latest React concepts and tools to ensure optimal application performance.
- Worked with a team of 4 engineers using technologies such as JavaScript, TypeScript, React, Redux Toolkit, MongoDB, Mongoose, Express.js, Node.js, Jest, Enzyme, and React Testing Library.

LANGUAGES

English – Upper-Intermediate
Russian – Native

EDUCATION

Francisk Skorina Gomel State University *2018 - 2022*
- Bachelor of Science in Computer Science and Software Engineering

The Rolling Scopes School *2020*
- React + JavaScript courses

PROFESSIONAL DEVELOPMENT

Yandex Practicum *08/2022 – 12/2022*
- Code Reviewer on React course

The Rolling Scopes School *03/2022 – 06/2022*
- Mentor on React course
