Summary

Senior Frontend Engineer and Team Lead with 6+ years of commercial experience building enterprise applications with React and TypeScript. Lead a team of 4 engineers while remaining hands-on with frontend development, architecture, code review, delivery planning, and mentorship. Experienced in state management, GraphQL, automated testing, accessibility, and application security, including building a custom WCAG- and Section 508-compliant component library from scratch.

Work Experience

Frontend Team Lead, Vention | Social Native

11/2022 – Present

Creator marketplace and advertising platform that helps brands discover creators, manage content, and run social advertising campaigns.

- Lead a sub-team of 4 engineers within a larger team of nearly 20, balancing team capacity, coordinating delivery, reviewing code and implementation decisions, mentoring engineers, and contributing hands-on to frontend development.
- Work closely with product stakeholders, designers, and backend engineers to define scope, shape technical solutions, break initiatives into implementable work, and coordinate delivery.
- Led the frontend delivery of a platform-wide redesign, defining scope, coordinating implementation, balancing engineering capacity, and implementing major parts of the redesign hands-on.
- Developed a new social account connection application to replace an unstable legacy solution, reducing failed connections from 30% to 5%.
- Co-designed an AI-powered creator recommendation system, managed its end-to-end implementation, and developed the frontend integration based on campaign settings and user preferences.
- Delivered frontend functionality for TikTok and Meta paid advertising, enabling users to create and configure ads using existing content, manage campaigns, and analyze paid and organic performance metrics.

Frontend Engineer, Vention | AgilQuest

01/2021 – 11/2022

Workplace resource reservation platform for managing shared assets such as rooms, equipment, and parking.

- Developed key user workflows including delegated reservations, visitor management, and interactive views for asset capacity, availability, and reservation management.
- Developed and maintained frontend functionality across the main web application, Outlook add-in, web-based kiosk, and dedicated accessibility application.
- Designed and built a streamlined, accessible version of the legacy web application from scratch, creating a custom component library to meet WCAG and Section 508 requirements and successfully passing an accessibility audit.
- Resolved frontend security findings identified during penetration testing, including unsafe redirects, sensitive data stored in localStorage, insecure cookie handling, and inline JavaScript and CSS that prevented enforcement of a strict Content Security Policy (CSP).

Digital quality-control platform for street food vendors, enabling managers and regional controllers to manage inspections, reviews, vendors, and reporting.

- Developed and maintained full-stack functionality across the React frontend and Node.js/Express backend, including authentication, user verification, vendor management, filtered search, routing, and internationalization.
- Implemented end-to-end data flows between the React frontend, Node.js/Express services, and MongoDB.
- Improved report generation performance by eliminating N+1 queries and restructuring expensive operations to run on smaller result sets, making report generation 5× faster.
- Developed unit tests across the project, bringing overall test coverage to 85%.

Skills

Frontend

React, TypeScript, JavaScript, Redux, Redux Toolkit, HTML, CSS, SCSS, Styled Components, CSS Modules

APIs & Data

REST API, GraphQL, Apollo Client

Testing

Jest, Vitest, React Testing Library, Playwright, Enzyme

Engineering

Frontend Architecture, Accessibility, WCAG, Section 508, Technical Leadership, Code Review, Mentoring

Build & Tooling

Vite, Webpack, npm, Yarn, Storybook, Git, Auth0

Backend

Node.js, Express.js, MongoDB, Mongoose

AI-Assisted Development

Claude Code, Cursor, Codex, GitHub Copilot

Languages

Russian - Native, English - Upper Intermediate

Certifications

Claude Certified Architect - Foundations

Anthropic

Additional Experience

Yandex Practicum, Code Reviewer

React Course

08/2022 – 12/2022

The Rolling Scopes School, Mentor

React Course

03/2022 – 06/2022

Education

Bachelor of Science in Computer Science and Software Engineering

Francisk Skorina Gomel State University

2018 – 2022
